

# What's New and Improved in Timeslips 2012?

## Names: Import/Export client reference settings

When setting up reference defaults for each client, you can now Import or Export settings between clients.

Client Reference Setup

Client

Nickname 1: ABC

Nickname 2: 02-1001

Also use template: Global references

Naming

Auto-format for Nickname 1:

Auto-format for Nickname 2: \A\B\C\-0000

Next number for Nickname 2: 1

References on slips

Default: <None>

Required

Import Export OK Cancel Help

You can set default references by setting the **Default** field to the desired reference within the **Client Setup** page of the **Client References** dialog box. (You can send reference defaults to other clients using the **Import** and **Export** buttons at the bottom of the **Client Setup** page of the **Client References** dialog box.)

This functionality should be particularly helpful to those using Timeslips to manage electronic billing requirements.
