

# What's New and Improved in Timeslips 2012?

## Slips: Choose how the dates for replacement slips appear on bills

When creating or editing replacement slips, you can now determine which start date and which end date will be used on the bill for this entry.

The screenshot shows a dialog box titled "- Itemized Slip Replacement Entry -". It has a close button (X) in the top right corner. The dialog is divided into several sections:

- Slips that match:** This section contains a "Slip type" field with radio buttons for "Time" (selected) and "Expense". Below it are two dropdown menus: "Activity" (set to "Research") and "Reference" (set to "<ignore>").
- Will be replaced by one slip with this description:** A text area containing the text "Research for preliminary hearing".
- Dates:** This section is highlighted with a red box. It contains two dropdown menus: "Start Date" (set to "Earliest Start Date") and "End Date" (set to "Latest End Date").
- Enabled for printing on bills:** A checkbox that is checked.
- Buttons:** On the right side, there are five buttons: "New", "First", "Previous", "Next", and "Last". At the bottom, there are three buttons: "OK", "Cancel", and "Help".

Previous versions of Timeslips automatically inserted the Earliest Start Date which wasn't the best choice in all situations. Thank you Sage for giving us choices!
